ORDER:

As an essential step towards the production of more food, the Government have drawn up a plan for the improvement of tanks and other irrigation sources in the Province. The Government of India's approval to ~~the~~ execution as a Grow More Food measure is being obtained and formal orders sanctioning it will be issued in due course. The works are to be spread over a number of years.

2. One of the items in the plan is the execution of repairs to spring ponds, spring channels and kasams. The Government are anxious that work on this ~~item~~ should begin in 1949-50 and desire that all preliminary steps like the preparation of estimates, etc., should be taken up at once so that the work might commence early in 1949-50. Orders regarding the allotment made for the scheme for the next financial year will be issued shortly. The Board is requested to issue necessary instructions to the Collectors ~~and~~ in this regard. No commitment of any kind should however be entered into before the funds are voted by the Legislature.

3. The government approve the Board's proposal that where the spring ponds are themselves Minor Irrigation Sources or where they feed or supplement Minor Irrigation sources, they may be repaired at the cost of the Government under the Minor Irrigation grant and that where the ponds are not Minor Irrigation sources or where they do not feed or supplement minor irrigation sources, Collectors may be requested to report the details to the Board so that the special sanction of the Board or the Government as the case may be obtained.

4. The Board of Revenue is also requested to submt monthly progress reports on the progress of the scheme by the end of the month, following the month to which the progress report relates, the first progress report reaching the Government by 31-5-1949.
